Roadmaps   Guides   Translations   ♥ YouTube Channel

Below you find a set of charts demonstrating the paths that you can take and the technologies that you would want to adopt in order to become a frontend, backend or a devops. I made these charts for an old professor of mine who wanted something to share with his college students to give them a perspective; sharing them here to help the community.

free-for-dev

Developers have a massive amount of services offering free tiers, but it can be hard to find them all. This is a list of software (SaaS, PaaS, IaaS, etc.) and other offerings that have free tiers for developers.

ripienaar / free-for-dev

A list of SaaS, PaaS and IaaS offerings that have free tiers of interest to devops and infradev

free-for.dev

Developers and Open Source authors now have a massive amount of services offering free tiers, but it can be hard to find them all to make informed decisions.

This is a list of software (SaaS, PaaS, IaaS, etc.) and other offerings that have free tiers for developers.

The scope of this particular list is limited to things that infrastructure developers (System Administrator, DevOps Practitioners, etc.) are likely to find useful. We love all the free services out there, but it would be good to keep it on topic. It's a bit of a grey line at times so this is a bit opinionated; do not be offended if I do not accept your contribution.

This list is the result of Pull Requests, reviews, ideas and work done by 500+ people. You too can help by sending Pull Requests to add more services or by remove ones whose offerings have...

Front-end Developer Interview Questions

A list of helpful front-end related questions you can use to interview potential candidates, test yourself, or completely ignore.

h5bp / **Front-end-Developer-Interview-Questions**

A list of helpful front-end related questions you can use to interview potential candidates, test yourself or completely ignore.

Front-end Developer Interview Questions

This repository contains a number of front-end interview questions that can be used when vetting potential candidates. It is by no means recommended to use every single question here on the same candidate (that would take hours). Choosing a few items from this list should help you vet the intended skills you require.

Note: Keep in mind that many of these questions are open-ended and could lead to interesting discussions that tell you more about the person's capabilities than a straight answer would.

You can read more about this project & its history here.

In roadmap to become a web dev, the link need to replace "kamrahahmedse" for
"kamranahmedse".
In free-for-dev replace "ripiennar" to "ripienaar".
In Front-end Developer Interview Questions replace "Front-end-Developer-Interview" to
"Front-end-Developer-Interview-Questions"
That is it.
